Lab tips...

An *IBMid* (freely available) is required to log in to virtual workstations for the lab. These virtual workstations are hosted on IBM Technology Zone (a.k.a. TechZone). You probably already have an *IBMid*, but, if not, try this link:

<https://www.ibm.com/account/reg/us-en/signup?formid=urx-19776>

During the lab session, to log in to TechZone and get a virtual workstation for the lab, scan the QR Code below or go here: <https://ibm.biz/CLE-SHARE>

Once logged in to your virtual workstation, follow the lab guide on the Chrome browser within your virtual workstation. The home page for Chrome has been set to the lab guide.

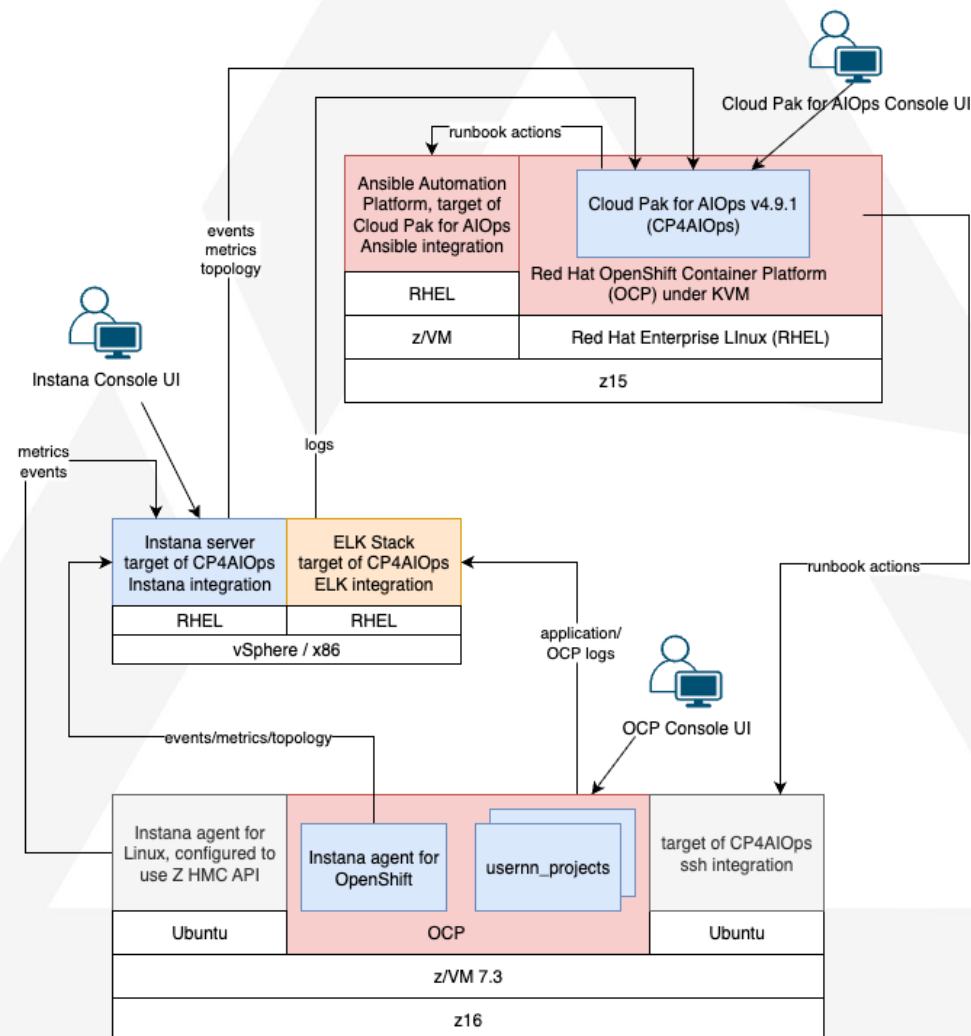

Lab tips, part deux

You'll be using the web console UIs for Red Hat OpenShift Container Platform, Instana, and Cloud Pak for AIOps. Many screens you'll see have tantalizing widgets and links that will tempt you to stray from the lab directions. Avoid the temptation or you will have difficulty finishing the lab in the allotted session time.

If you do have trouble finishing the lab, or even if you've finished it and want to explore more, your lab virtual workstation will be available to you until Friday at 9:00 am US EDT. The lab documentation itself will remain publicly available at <https://ibm-wsc.github.io/aiops-z-SHARE>

Ask the lab instructors about how you can take a longer lab (~ 2-3 hours) if you would like to go a bit deeper than we could take you in this one-hour session.

Lab environment

Your feedback is important!

Submit a session evaluation for each session you attend:
